

Index for Workbook 21

Causal sequences _____	10	Pole of a function _____	53
Convolution summation _____	68, 76-80	Residue at a pole _____	54, 55
Currents in a ladder network _____	60	Right shift of a sequence _____	8, 89
Delta sequence _____	14	Right shift theorem _____	30, 34
Difference equation _____	5, 37	Sampled functions _____	85-95
- first order _____	5, 37	Sampling _____	3, 85-95
- homogeneous _____	6	Second order system _____	70
- second order _____	6, 47	Sequences _____	3
Engineering applications _____	60, 64-84	Series combination of systems _____	72
Feedback convolution _____	75	Shifting of sequences _____	8, 30
Fibonacci sequence _____	7	Signal sampling _____	85-95
Final value theorem _____	82	Steady state _____	72
Geometric sequence _____	16	Systems _____	64-84
Homogeneous difference equation _____	6	Tables of z-transforms _____	35, 95, 96
Initial value theorem _____	81	Transfer function _____	65, 67
Inverse transform formula _____	56	Transients _____	72
Inverse z-transform _____	14	Trigonometric sequences _____	19
Inversion by residues _____	53-59	Unit impulse function _____	92
Ladder network _____	60	Unit impulse sequence _____	14
Laplace transforms _____	90	Unit ramp sequence _____	27, 29, 87
Left shift of a sequence _____	9, 89	Unit step function _____	86
Left shift theorem _____	33-34	Unit step sequence _____	10, 15
Linearity property _____	18-19	Zero input response _____	66
Multiplication by		Zero state response _____	66
- a^n _____	24	z-transform _____	13
- n _____	27	EXERCISES	
		63, 83
